

What is claimed is:

1(currently amended). A shower arrangement, comprising:

a fitting housing coupled to a supply of water,

an arced hollow section having a first leg that lies at least partially in a plane and is coupled to said ~~provided with a~~ fitting housing so as to carry the water, a second leg lying at least partially in a plane, and a cross-member that connects top ends of the first and second legs, ~~and~~

a nozzle that is affixed to the cross-member above a center of a showering area assigned to the shower arrangement,

wherein the supply of water is coupled through the first leg to the nozzle.

2(currently amended). A shower arrangement, comprising: ~~The shower arrangement according to claim 1, in which~~

at least one wall of a room, the wall bordering a showering area;

a fitting housing coupled to a supply of water,

an arced hollow section having a first leg that lies at least partially in a plane and is coupled to said fitting housing so as to carry the water within said arced hollow section, a second leg lying at least partially in a plane, and a cross-member that connects top ends of the first and second legs,

wherein the two legs are ~~structured to be~~ permanently affixed to on the at least one a wall of the room, and

at least one nozzle coupled to the arced hollow section and directing the water into the showering area.

3(currently amended). The shower arrangement according to claim 2 ~~4~~, in which the cross-member is guided over a ~~the~~ center of the showering area spaced from the wall of the room.

4(previously presented). The shower arrangement according to claim 1, in which the two legs lie in the same said plane.

5(previously presented). The shower arrangement according to claim 1, in which the two legs lie in parallel planes.

6(previously presented). The shower arrangement according to claim 1 in which the entire said hollow section lies in a plane.

7(previously presented). The shower arrangement according to claim 1 in which the cross-member bends out of the plane of at least one leg.

8(previously presented). The shower arrangement according to claim 1, in which both said legs are straight.

9(previously presented). The shower arrangement according to claim 1, in which both said legs are provided with nozzles.

10(currently amended). The shower arrangement according to claim 1, ~~comprising at least one water line inside~~ **wherein** the arced hollow section **provides a water line coupling between the first and second legs, carrying water from the fitting housing to the at least one nozzle.**
